Node-RED interface showing a flow named "Flow 1". The flow consists of an "IBM IoT" node connected to a "msg.payload" node. The "debug" console on the right displays the following log entries:

```

Node-RED interface showing a flow named "Flow 1". The flow consists of an "IBM IoT" node connected to four function nodes: "Humidity", "Moisture", "temperature", and "Random number". These function nodes are all connected to a "msg.payload" node. The "debug" console on the right displays the following log entries:
